1:30 p.m. 3:00 p.m. Pinch Point: Critical Minerals and the Looming Supply Chain Vulnerability in the Quest for Clean Energy

Access to the critical minerals needed for advanced digital components used in renewable energy production, electric vehicle transportation, and defense equipment has become a flashpoint for national and energy security for the United States. This session will identify the critical minerals at issue, how they are used in energy, transportation and other industries, and the quantities needed to meet national and global decarbonization goals. The session will address the implications of this mineral dependency for national security and achievement of clean energy goals, as well as what the Department of Energy and industry can and should do to address supply chain vulnerabilities, including research and development on alternatives to critical minerals, as well as mining, recovery from coal ash and residuals, and development of domestic midstream production and manufacturing facilities.

**MODERATOR:** *Hon. Ann Rendahl, Chair, NARUC Committee on Electricity; Commissioner, Washington Utilities & Transportation Commission*

*Hon. Mary Throne, Commissioner, Wyoming Public Service Commission*

3:30 p.m. – 5:00 p.m. Is a Clean Energy Standard the Best Approach for States to Achieve Their Clean Energy Targets?

This panel will discuss a broad array of issues related to implementing a Clean Energy Standard (CES) and related issues including the benefits and challenges for states choosing a CES approach and address other options that may be better suited to reaching those goals in some states. Some key aspects will be considered such as: whether state actions are necessary when utilities are taking proactive actions to meet those targets; whether states are fully equipped to comply with a possible national CES; the reliability impacts of incorporating more renewable resources; the role for RNG, hydrogen and other fuels in the future energy mix and approaches for states to effectively plan and determine who pays for the necessary transmission investment to bring renewable energy to the market. The panel will also discuss land-use challenges and NIMBY issues associated with building new transmission and generation. Lastly, this panel will also explore options for states to address any stranded investment in energy infrastructure that might be incurred as part of the energy transition.

**MODERATOR:** *Hon. Julie Fedorchak, NARUC 2nd Vice President; Commissioner, North Dakota Public Service Commission*

### 10:30 a.m. – 12:00 p.m. Broadband Funding Galore! - Implications for Universal Service, Legacy Networks and New Technologies

States are in the driver seat as billions of broadband dollars are flowing for distribution by state governments. Whether it's the CARES Act, Consolidated Appropriations Act (CAA), American Rescue Plan Act (ARPA), or the Bipartisan Infrastructure Framework in the Infrastructure and Investment Jobs Act (IIJA), states have an opportunity as never before to shape the distribution of federal broadband funds. This panel will explore whether there are overarching principles for the wise use of broadband deployment funds; the impact of all of this funding for new broadband investment on legacy networks, new technologies, and carrier of last resort obligations; and how the concepts of universal service support for high cost areas, sustainability and affordability are changing.

**MODERATOR:** *Hon. Sarah Freeman, Chair, NARUC Education Subcommittee & CPU Liaison; Commissioner, Indiana Utility Regulatory Commission*

**SPEAKERS:** *Teresa Ferguson, Sr. Director Broadband & Infrastructure Funding, National Rural Telecommunications Cooperative*

*Alex Minard, VP & State Legislative Council, Government Relations, NCTA – The Internet and Television Association*

### 1:30 p.m. – 3:00 p.m. NextGen Nuclear Energy and Other Low Carbon Strategies in the Energy Transition

Emerging clean energy technologies such as advanced nuclear offer great potential to reach U.S. decarbonization goals. State regulators play a critical role in shaping policies that can enhance the research, development and commercial deployment of these emerging technologies. This session will explore the obvious benefits as well as the costs and challenges associated with advanced reactors and other emerging technologies, the necessary infrastructure needed to support deployment, and examples of federal or state regulations supporting commercial viability.

**MODERATOR:** *Hon. Michael Caron, First VP, NARUC; Commissioner, Connecticut Public Utilities Regulatory Authority*

**SPEAKERS:** *Andrew Place, State Energy & Climate Policy Director, Clean Air Task Force*

*Carol Lane, Government Affairs, X-energy*
