WHO SHOULD ATTEND?

Attendees with less than one year's experience in the regulatory arena and anyone wishing to obtain a basic understanding of the principles involved should attend this course. Commissioners, economists, rate analysts, accountants, attorneys, engineers, public information officers, administrative law judges, consultants, and consumer advocates will all benefit from the basic skills acquired in this course.

WHY SHOULD EMPLOYEES ATTEND THIS RATEMAKING COURSE?

The issues confronting natural gas local distribution (LDC) industry can be very complex and confusing to the employee with newly acquired responsibilities in the area of rates and regulation. This course will give attendees practical analytical skills needed to understand the topics covered as well as an integrated framework showing how they fit together. Through a combination of lectures, discussion and integrated problems, this course will give the attendees the analytical skills necessary to be more productive in the changing utility environment.

Each week-long course covers the basics of industry technology, industry structure and regulation, revenue requirements, cost allocation, rate design, key issues facing the natural gas LDC industry, and rate-case procedures. In-class problems provide attendees with hands-on experience.

FACULTY

The Center for Public Utilities is fortunate to have outstanding course instructors, with each having many years of practical experience in the regulatory arena. Not only are these instructors experts in their fields, they have extensive teaching experience and are extremely approachable. Many of these instructors have been with the Center for Public Utilities for over 16 years. The CPU course instructors work collectively as a team and are continually re-evaluating and refining their individual set of materials as well as the overall organization and flow of the entire course. Each member is fully aware of how their own set of materials fits into the overall picture of the course. In this way, each of the week-long courses is truly integrated, which results in the best possible product for the attendees.

The Center for Public Utilities (CPU) has been housed in the College of Business at New Mexico State University (NMSU) and has been conducting training courses since 1978. The National Association of Regulatory Utility Commissioners (NARUC) officially sanctions the programs offered by the CPU. The CPU:

- Produces practical training courses, instruction/training materials and out-reach programs directed towards the needs of professional staff at federal and state commissions, utility companies and other stakeholders in the Electric, Natural Gas LDC, Natural Gas Pipeline and Water Industries;
- Produces issues conferences directed towards the needs of upper management and professional staff at federal and state commissions, utility companies and other stakeholders in the Electricity, Natural Gas, Telecommunications and Water Industries;
- Is completely self-funded through the conference fees it charges for its programs and by industry sponsorships;
- Averages about 450 conference attendees per year, who come from all 50 states as well as many foreign countries.
